

Abstract:

LIQUID CLEANING COMPOSITONS AND THEIR USE

5 An aqueous liquid cleaning composition having a pH of at  
least 7, preferably from 7 to 11, more preferably from 7  
to 10 and comprising from 1% to 90% by weight of  
surfactant, a proteolytic enzyme and a primary stabiliser  
therefor, the composition further comprising an organic  
10 substance which forms a complex with a transition metal,  
the complex being capable of catalysing bleaching of a  
substrate by atmospheric oxygen.
